Avow Systems, Inc. Announces Five Year Agreement with Indiana University System for Electronic Transcript Processing

DENVER, CO – April 21, 2010 – Avow Systems, Inc., the leading provider of products and services for certifying and delivering secure electronic documents on behalf of educational institutions, announced today a new five year, exclusive agreement with the Indiana University system for processing of electronic transcripts.

After careful evaluation of a request for proposal, Indiana University selected Avow Systems to provide electronic transcript services that will allow students and alumni to order an official Certified PDF Transcript™ for secure electronic delivery to themselves, other higher education institutions, and third party recipients. When fully deployed, all eight Indiana University campuses will offer their students and alumni this new capability. The new service from Avow Systems will be fully integrated with Indiana University's student information systems for real-time, automated processing and fulfillment of official transcript requests.

Registrars at each of Indiana University's eight campuses will be able to offer this new service to students and alumni in addition to traditional paper-based transcript services. Availability of electronic transcripts is expected to improve services for both students and document recipients, as well as increase processing efficiencies for fulfillment when compared to paper handling and distribution. "This new capability will allow our students and alumni to experience real-time ordering and delivery of their official academic transcripts in a matter of minutes," said Mark McConahay, Senior Associate Registrar of the Bloomington, Indiana campus.

"We are extremely proud to partner with such a premier institution as Indiana University as they continue to exceed the expectations of their students and alumni in terms of service," said Mark Johnston, Managing Director of Avow Systems. "Our Authentic Document Delivery Service (+ADDs)™ continues to gain worldwide adoption by leading institutions like Indiana University who are looking to save time and money. The Certified PDF Transcript™ is quickly becoming the standard for official academic transcripts."

About Avow Systems, Inc.

Avow Systems, Inc. is a software-as-a-service company which offers the only real-time, fully integrated service that supports ordering, PDF generation, certification, rights management and secure delivery of electronic transcripts as well as other high-stake documents.
